

Making implementation easy

Clinical trial support services

When you use any of our physiological monitoring devices in your clinical studies, you get more than just advanced technology. You'll receive comprehensive support services to help you implement these valuable technologies and reduce the burden on you, your subjects, and study site staff. Our team of specialists manages much of the implementation process so that you don't have to.

PHILIPS

RESPIRONICS

Protocol advising

Our experts can advise you on the most appropriate method for incorporating our objective technologies to best capture data that supports your endpoints.

Equipment leasing

Our customized device rental programs accommodate your specific equipment and software needs.

Inventory management and logistics

Our staff manages your product inventory – including shipping, receiving, and maintenance – throughout the study.

Site training

We offer a variety of training options tailored to the specific requirements of the study protocol. Your study site staff will learn how to configure devices, adhere to

the protocol visit by visit, and download and transfer data to us. Each study site also receives a customized training guide.

Central data scoring, analysis, and delivery

We score and aggregate the subject data and send easy-to-read reports to your data management team.

Dedicated support

A toll-free, dedicated technical support line is available for the study sponsor and the study site to address any questions throughout the study.

Software customization

Our team of software engineers and project managers works with you to provide customized outcome data reports.
